Lenovo Accessories

History

Since the first ThinkPad and Dock in 1992, Lenovo business accessories have been creating innovative solutions that complement and enhance the productivity of the new workforce.

Mission

All our accessories share common goals to enrich your work experience, eliminate limitations, and expand your capabilities. Lenovo accessories exist to help you make the impossible, possible.

Whether at work, on the go, or at home, you'll find accessories for every need and every device that makes your work more mobile, productive, and secure.

Performance. Mobility. Flexibility.

Lenovo accessories provide unmatched productivity and reliability in the office enabling businesses to achieve record performance. On the go, Lenovo meets the demand for mobility in the new workforce with accessories crafted to help workers travel light and stay productive wherever they are. Lenovo knows the workforce of the future will be remote and offers accessories that empower remote employees to work off-site without sacrificing security.

Lenovo Go Accessories

Those who lead the hybrid work revolution believed that giving workers more choice would pay off. And they were right. But there's a problem. The world is not designed to support hybrid work, which means workers constantly battle with their technology and environment. This bottleneck is stopping us from achieving the full potential of remote working. Lenovo Go aims to bridge the gap between expectations and reality with a suite of innovative accessories solutions.

Lenovo Computer Locks

The cost of a lost or stolen company device goes far beyond the value of the hardware alone. The consequences of equipment being acquired by a malicious third-party could cost a company their reputation, intellectual property, and millions of dollars in fines and data loss.

Lenovo's Computer Locks provide a simple solution to a complex problem by physically fastening devices in place with ultra-tough cable locks, so that nobody can tamper with or steal your device when you're away from your desk.

NVIDIA® RTX A5000 24 GB GDDR6 Graphics Card

- 24 GB of GDDR6 memory, expandable to 48 GB with NVLink®
- Peak memory bandwidth up to 768 GB/s
- Display Connectors: 4 VESA DisplayPort™ connectors
- PCI Express Interface: PCIe 4.0 x 16
- Power connector and header: 1 x PCIe 8-Pin
- Total graphics power 230W

ThinkStation NVIDIA® Quadro P2000 5 GB GDDR5 DisplayPort™ x 4 Graphics Card with HP Bracket

- Key performance features and capabilities include: 5 GB GDDR5 graphics memory allows designers and animators to model, store and render characters and scenes at unprecedented scale, complexity, and richness
- 1024 streaming multi-processor cores deliver incredible performance with a peak power consumption of 75W in a cool and quiet single slot form factor
- Supports four simultaneous display and up to 5K resolution with VESA DisplayPort™ 1.4
- Comes with high-profile bracket, 100% compatible with ThinkStation specified tower form factor machines

NVIDIA® T1000 4 GB Mini DisplayPort™ x 4 Graphics Card with HP Bracket

- Comes with high-profile bracket
- 4 GB of GDDR6 memory
- PCI Express Interface: PCIe 3.0 x 16
- 896 streaming multi-processor (SMX) cores deliver incredible performance with peak power consumption of 50W
- Support 4 simultaneous display and up to 5K resolution with VESA DisplayPort™ connectors

NVIDIA® RTX A2000 6 GB Mini DisplayPort™* 4 Graphics Card with HP Bracket

- 6 GB of GDDR6 memory
- Peak memory bandwidth up to 288 GB/s
- Display connectors: 4 x VESA Mini DisplayPort™ connectors
- PCI Express Interface: PCIe 4.0 x 16
- Power connector and header: No external power connectors

NVIDIA® RTX A4000 16 GB DisplayPort™ x 4 Graphics Card

- 16 GB of GDDR6 memory
- Peak memory bandwidth up to 448 GB/s
- Display Connectors: 4 x VESA DisplayPort™ connectors
- PCI Express Interface: PCIe 4.0 x 16
- Power connector and header: 1 x PCIe 6-Pin

ThinkStation NVIDIA® RTX A6000 48 GB GDDR6 Graphics Card

- Ultra-fast 48 GB GDDR6 memory with error-correcting code, scalable up to 96 GB with NVLink®
- Max. power consumption: 300W
- 4 x DisplayPort™ 1.4
- NVIDIA®'s Ampere architecture delivers the highest performance and performance per watt
- Second-Generation RT Cores deliver massive speedups for workloads and also speeds up the rendering of ray-traced motion blur for faster results with greater visual accuracy
- NVIDIA® NVLink® increased GPU-to-GPU interconnect bandwidth provides a single scalable memory to accelerate graphics and compute workloads and tackle larger datasets
- System Interface: PCI Express 4.0 x 16, support for PCI Express Gen 4 provides double the bandwidth of PCIe Gen 3, improving data-transfer speeds from CPU memory for data-intensive tasks like AI and data science
